

Proposal: AI Tutor for Schools

We are pleased to present **AI Tutor**, a powerful and customizable educational solution designed to integrate seamlessly with your school's teaching and learning processes. We offer AI Tutor on **two implementation models** to suit your institution's requirements:

Method 1 – SaaS Model (Subscription-Based)

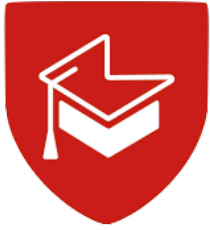

- We will set up the **server, API, and proxy redirected website** for your school.
- The AI Tutor app will run under **your school's branding** (white-label solution).
- **Pricing:**
 - Initial setup: **Rs. 25,000/=**
 - Subscription: **Rs. 1,200/= per student per month** (based on registered students)
- **Proven Model:** We have already deployed this SaaS-based AI Tutor solution successfully at **Focus College** [Focus AI at Focus College](#).

Method 2 – On-Premise Setup (Independent System)

- We will set up the entire AI Tutor system on **your own server** and integrate it with your school's website.
- Your institution will need to provide the **server infrastructure and API access** required for installation.
- This system will be **fully owned by your school**.
- **Pricing:**
 - One-time setup fee: **Rs. 699,000/=**
 - Includes **1 year of free support**; thereafter, support can be continued at an agreed fee.

Features of AI Tutor

- **Curriculum Coverage:** Supports London Cambridge, IGCSE, Edexcel OL/AS/AL; with optional GCE OL and AL. Any other curriculum can be added.
- **Interactive Learning:** Real-time AI-powered chat restricted to curriculum and syllabus content. Students are prevented from deviating from studies.
- **Resources:**
 - Access to complete subject resources including past papers.
 - Students can **download resources, upload documents, and interact with them through AI chat**.
- **Personalized Support:** AI Tutor adapts to student queries, ensuring subject-specific guidance.
- **Branding:** Fully customizable to carry your school's name and identity.

FAQ

1. What LMS or platform does it integrate with?

- Method 1 (SaaS): Runs via a proxy redirected website under your brand, independent of LMS.
- Method 2 (On-Premise): Fully integrated into your existing school website/server.

2. What specific features does it offer?

- Real-time subject-based chat (restricted to syllabus).
- Resource library with past papers and downloadable content.
- Ability for students to upload and interact with past papers/resources.
- Curriculum coverage for London Cambridge, IGCSE, Edexcel OL/AS/AL, and optional GCE OL/AL.

3. What is the pricing model?

- SaaS Model: Rs. 25,000 (initial setup) + Rs. 1,200 per student per month.
- On-Premise Model: Rs. 400,000 (one-time setup) + free support for 1 year.

4. Are there any technical requirements?

- SaaS: No additional requirements (we manage server, API, proxy setup).
- On-Premise: School must provide its own server and API credentials for setup.

5. How is data privacy and security handled?

- SaaS: Managed on our secure servers with restricted, syllabus-focused AI.
- On-Premise: Full data ownership remains with your school since it runs on your infrastructure.

6. Is there documentation or customer support available?

- Yes. Comprehensive **user documentation** and **setup guides** will be provided.
- Support:
 - SaaS: Ongoing as part of monthly subscription.
 - On-Premise: 1-year free support, extendable at agreed terms.
